This ten week course is designed to help women develop a consistent positive self-image based on a new sense of competency and self-worth. Students learn practical skills for building confidence through reading, journaling, brief lectures, class discussion and experiential tasks.

The concepts taught in this course help women understand what factors diminish self-esteem and how to actively participate in rebuilding their own psychological health.

What others have said about this class:

- This was a comforting and nurturing environment to explore and work on self-esteem. Jennie C.
- An extremely valuable experience. There was so much to learn that has helped me make better choices. Jill M.
- I found this to be an amazing and life changing experience. Elizabeth C.
- There was such respect and lack of judgment in this class. I felt completely safe opening up. Cyndi K.
- I’m no longer so angry all the time now that I am better at sticking up for myself. Carol P.
